

## April 2010 – Mike Elliot Promoted

### Mike Elliot has been promoted to Service and Sales Manager

Lead Service Technician Mike Elliott has been promoted to **Service and Sales Manager**. Mike is a dedicated and upbeat employee. He is a positive influence on all of those around him, and very customer oriented.

Mike has been with TESCO/SYMEX Americas for well over 10 years. Starting as a junior service technician, he was almost immediately promoted to service technician because of the skill sets he brought with him. These and his great attitude work together to see him promoted to Lead Technician in 2007.

Mike is about to take the plunge into marriage. He and his long-time friend and recent fiancée Manda will be married in May 28, 2011. He's is very trainable, so we are certain he will make a great husband in Manda's eyes. He is already a star in ours.

While marriage may be life-changing, as it is for most of us, directing our service and sales effort is something Mike has already proven he can do, and do well. We know you will join with us in congratulating Mike as he wraps his arms around both of his new roles.

## SYMEX Americas Succeeds in India

Licensee SAI Tools has landed its first order in India for a DRYVac™ Vapor Recovery System for India Oil Company Ltd. CEO Murli Rajan is most proud of his team in their diligent efforts to win this order, and to execute the manufacturing and assembly of the major components locally.

"It's been an arduous task," says Mr. Rajan. "Any time you take on something new for the first time, it's a steep learning curve. But now that the start-up is near, I am extremely proud to bring this excellent technology to my country." SYMEX Americas is extremely proud of the SAI Tools team effort to make this project a reality.
